

Medama Excentr Hypro M+

The Medama Hypro M+ Mini Plus is ideal for both regular basic cleaning and periodic extreme deep cleaning, the more rigorous work. Thanks to its rectangular shape, this machine is ideal for cleaning along/against skirting boards. The machine also easily cleans right into the corners. The Hypro M+ Mini has a removable power cable to give you greater flexibility. If the power cable is damaged, you do not need an electrician to replace it.

Since the Hypro M+ Mini can also be used without weights, it is a great machine to use on stairs and uneven floors. Just as the other Medama machines, this machine is also extremely sturdy and made entirely from stainless steel.

Weight

The basic Hypro M+ Mini model weighs 37 lbs, but it can be made heavier by adding weights. The maximum pad pressure after adding these weights is 66 lbs. Thanks to its flexible construction, the Hypro M+ Mini is easy to lift.

Ergonomics and Transport

The large rear wheels ensure a perfect balance and hardly produce any vibrations. It is a very ergonomic machine. The Hypro M+ Mini is therefore, extremely easy and ergonomic to use. The large wheels also make it easy to transport the machine.

Extraction

The back of the white plastic edge of the Hypro M+ Mini has a connection for an extraction hose. The dust can then be easily extracted through the openings in the pad holder. So, if desired, the machine can be used without producing any dust.
