Medama Super Shield
Floor Cleaner & Embedded Dirt Remover

Clean to the floor.
Leave nothing behind.

Why a near-neutral, no-residue cleaner outperforms surfactant-heavy and polymer-based cleaners, and protects the floors you've already invested in.

Ready-to-use **pH 8.0** | Concentrate pH 10.5 · dilute as directed

THE NEAR-NEUTRAL ADVANTAGE

Protects floors & finishes

- **Won't dull or strip finish:** high-pH cleaners soften coatings; near-neutral keeps the shine longer, with fewer burnish and recoat cycles.
- **Safe on stone:** no etching of marble, terrazzo, or limestone, unlike acidic cleaners.
- **Gentle on grout, rubber, LVT & linoleum:** no drying out or discoloring over time.
- **No rinse needed:** no alkaline film left behind, which saves labor.

THE NEAR-NEUTRAL ADVANTAGE

Safer for people & facilities

- **Staff:** gentler at use strength than high-pH cleaners. Follow the SDS for gloves and eye protection.
- **Patients & visitors:** fewer harsh fumes in occupied and sensitive areas.
- **Lower mixing risk:** far less chance of a dangerous reaction if products are combined.
- **Simpler programs:** one product for most surfaces means fewer SKUs, less training, and fewer mistakes.

THE HIDDEN COST OF

Surfactant-heavy cleaners

- **Sticky residue** attracts and traps dirt, so floors re-soil faster.
- **Dull haze** clouds the finish and masks shine.
- **Slip risk** from soapy film, a real liability in healthcare.
- **Rinse step** is required, and often skipped.
- **Foaming** can overload autoscrubber recovery tanks.

THE HIDDEN COST OF

Polymer “clean & shine” cleaners

- **Layer-on-layer buildup**, heaviest at edges and corners, sealing dirt in.
- **Yellowing & darkening** over time, especially on light floors.
- **More stripping**, the costliest, most labor-intensive job in floor care.
- **Coating adhesion problems** that can cause peeling and early finish failure.
- **Burnishing smears residue**, creating haze and dust.

TYPICAL CLEANERS	MEDAMA SUPER SHIELD
✖ Residue builds up with every use	✔ **Leaves no residue behind**
✖ Dirt gets trapped under film	✔ **Removes deeply embedded dirt**
✖ Periodic stripping cycles	✔ **Restores floors without stripping**
✖ Can damage finish and coatings	✔ **Safe on waxed, unwaxed & coated floors**
✖ Different products for each job	✔ **One product: 1 oz/gal daily · 8 oz/gal restoration**
✖ Harsh chemistry and odors	✔ **EPA Safer Choice certified · odorless · non-slippery**

> *“Most cleaners leave something behind, whether soap or polymer. Over time that residue becomes the dirt you're paying to strip. Super Shield cleans down to the floor and leaves nothing behind.”*
